

AMENDMENTS TO THE SPECIFICATION

Replace Graphs 1 to 4 with Figures 1 to 4. Figures 1-4 are included herewith.

Add the following new paragraph above current paragraph [0001]

BRIEF DESCRIPTION OF THE FIGURES

Figure 1 is a graph illustrating the percentage deviation in capacity from R404A for R22, R407C and the high R125 containing blends based on a mean evaporating temperature of -30°C.

Figure 2 is a graph illustrating the percentage deviation in COP from R404A for R22, R407C and the high R125 containing blends based on a mean evaporating temperature of -30°C.

Figure 3 is a graph illustrating the percentage deviation in capacity from R22 for R404A, R407C and the high R125 containing blends based on the mean evaporating temperature.

Figure 4 is a graph illustrating the percentage deviation in COP from R22 for R404A, R407C and the high R125 containing blends based on the mean evaporating temperature.
